WINDOWS & DOORS

Extraordinary Entrances

© Scot Hill Photography

Make a Grand Entrance

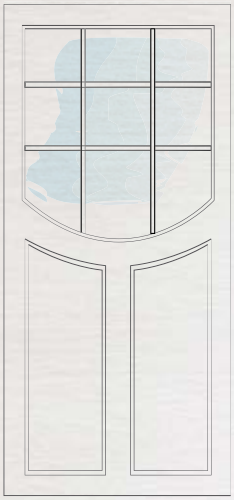
As a defining feature of your home, the entrance door can make a strong and lasting impression. At Kolbe, our craftspeople create each door by hand to match your vision, for a custom entryway that truly makes a statement. With numerous configurations and endless possibilities, you can create a one-of-a-kind entrance door that reflects your style and personality.

Photo © Henke Studios

Create a Modern Entryway

If you enjoy the sleek look of a contemporary entrance, Kolbe has the solutions to make a simple statement that complements the rest of your home. Embrace the view with unique glass configurations, clean lines and narrow frames. Obscure glass options help create privacy and shading when and where you need it.

Photo © Cory Klein | CKP Studio



Honor History & Style

With an extensive selection of finishing touches, Kolbe offers many options for traditional door styles. We can create custom doors for historic renovations, adding exterior casings, brickmouldings and accessories, to replicate styles from all eras for a door design that stands the test of time.

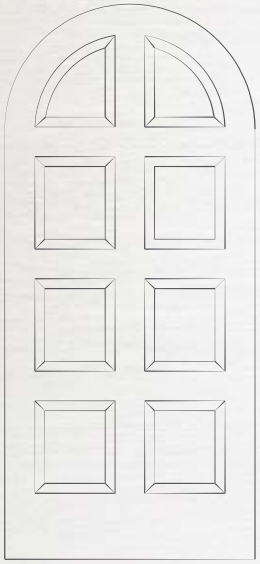


Photo © Daniel Showalter Photography

Photo © Dolf Vermeulen

Expand Your Entryway

Entrance doors are available in single, double and French units, for more illumination or wider openings. Pivot doors are unique, elegant options for a wider single door offering larger openings with increased daylight and views. Highlight your entrance with decorative hardware or specialty glass for a truly one-of-a-kind look.

Architect: Mark Van Acker

Shape Up Your Entrance

If a custom silhouette helps you express your style, Kolbe can help! Our flexible designs allow you to create a custom shaped door or entryway that adds drama and highlights the architectural details of your home.

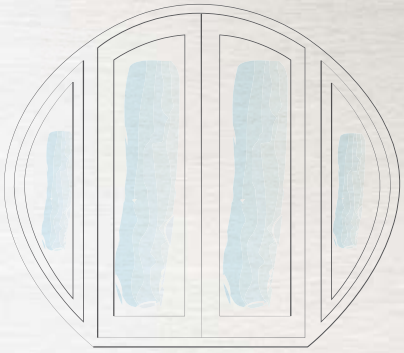

Photo © Jeeheon Cho

Illuminate Your Design

Customize your door with sidelites or transoms – or a combination of both – to add more light and warmth to your entrance. Increase airflow with operating sidelites that create a wider opening for ventilation.

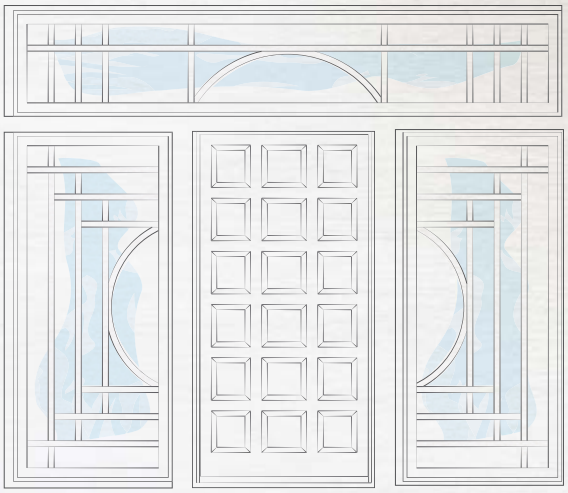

Photo © Russell Abraham Photography

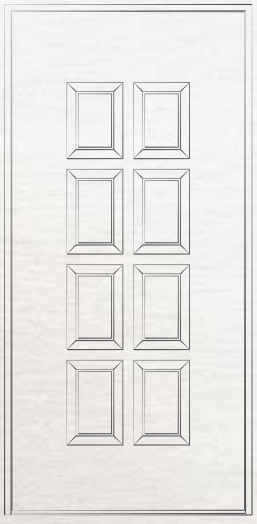
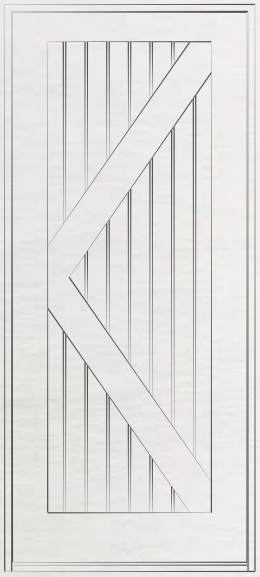
© LandMark Photography

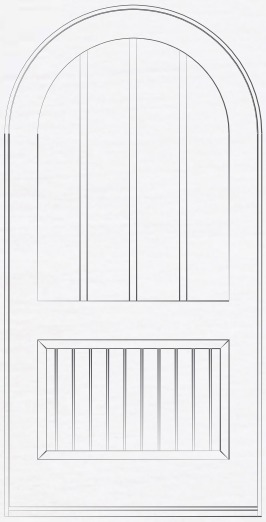


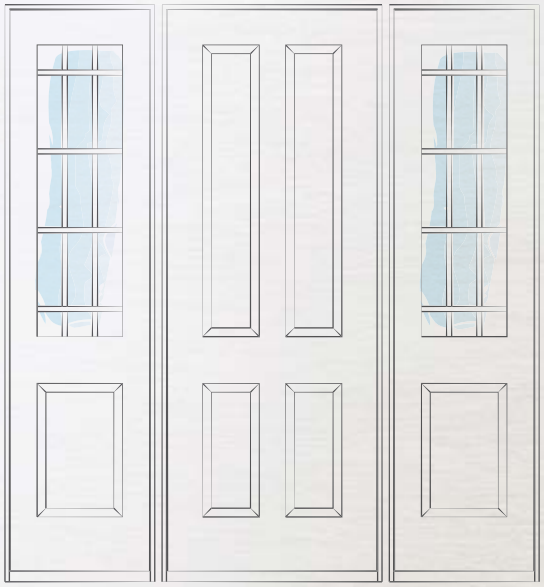
Add Dimension to Your Door

Add depth to your entrance door with various panel options. Choose from a traditional design or create a custom pattern to accentuate the overall appearance of your entryway. With multiple wood species, styles, shapes and sizes to choose from, the opportunities for personalization are nearly endless.

© Jim Kruger | LandMark Photography

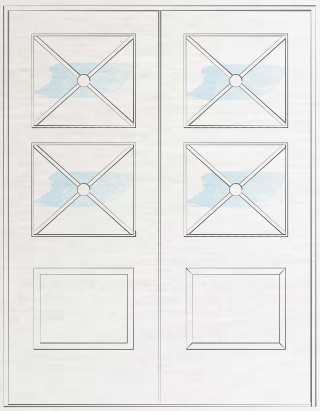


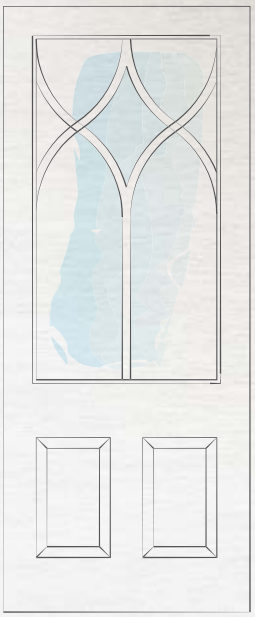




Use Patterns to Add Distinction

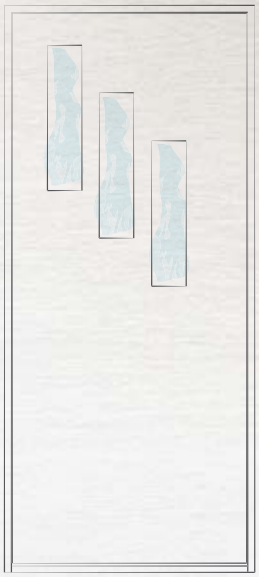
Showcase finely crafted glass for a beautiful, welcoming entrance. Choose from a variety of divided lite sizes and styles to add detail and elegance, or create a custom pattern for an even more personal touch.





Select Magnificent Finishing Touches

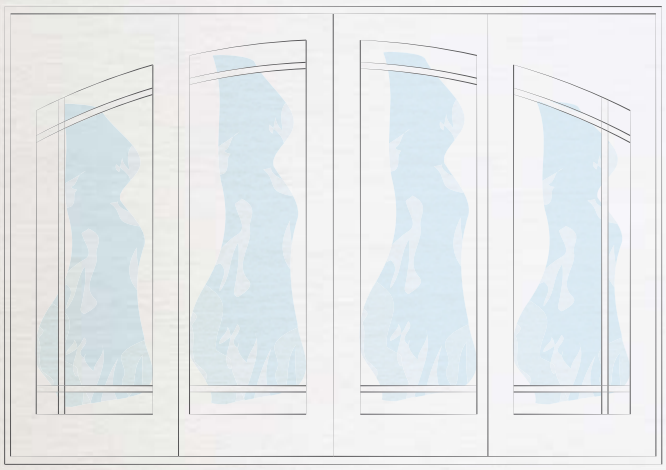
Kolbe has an extensive selection of glass, finishes and hardware to complete your door. Choose from our vast array of interior and exterior finishes, or create a custom color for a signature statement.



Upgrade to High Performance

Entrance doors can be modified for high performance or even impact performance. Whether you are looking for enhanced energy efficiency or resistance to hurricanes, Kolbe offers products that withstand the conditions of any climate.

© Jay Graham Photography



Options & Accessories

Kolbe offers a multitude of glass, wood species, frame and trim options to ensure that every door makes an impression. Choose from an expansive selection of interior and exterior finishes, or create your own custom color for a signature statement. To complete the look, a large array of hardware styles and finishes is available to make your entry extraordinary.

VistaLuxe® Collection

Kolbe's VistaLuxe Collection is ideal for contemporary designs that utilize clean lines and large expanses of glass. The **VistaLuxe WD LINE** offers versatility, with extruded aluminum exteriors and warm wood interiors, whereas the **VistaLuxe AL LINE** offers European-styled thermally broken, all-aluminum windows and doors. The collection's design flexibility, functionality, and endless style choices are sure to match any modern aesthetic.

Options are available for coastal areas requiring hurricane impact performance.*

- Inswing & outswing entrance doors
- Pivot doors
- Commercial doors
- Operational sidelites
- Transoms

Ultra Series

The Ultra Series was designed for versatility, durability and performance. With an array of options, it can mimic the traditional style of wood windows and doors with a warm wood interior and exterior trim details. The extruded aluminum exterior is strong and durable, with a palette of long-lasting, vibrant colors. Options are available for coastal areas requiring hurricane impact performance.*

- Inswing & outswing entrance doors
- Dutch doors
- Pivot doors
- Commercial doors
- Operational sidelites
- Transoms

Heritage Series

Kolbe's Heritage Series doors are carefully crafted with a wood interior and exterior, making it possible to create architecturally intricate and historically accurate details. A variety of wood species, interior stains and paints, true divided lite patterns and profiles are available. The exterior may be finished with a latex primer, or coated with K-Kron II – a durable exterior finish that enhances and preserves the look of wood doors. Options are available for coastal areas requiring hurricane impact performance.*

- Inswing & outswing entrance doors
- Dutch doors
- Commercial doors
- Operational sidelites
- Transoms

* Impact options are not available for all products. Please ask your dealer for more information.

Frames

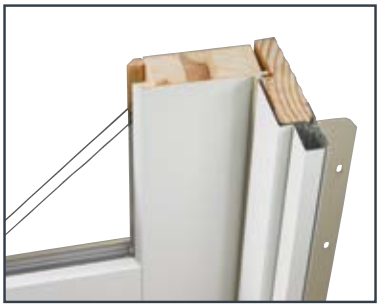
VistaLuxe WD LINE

The VistaLuxe WD LINE extruded aluminum clad frame for door panels matches VistaLuxe Collection windows for a seamless look. As standard, the frame is finished with a 70% PVDF fluoropolymer finish offered in our extensive color selection, including mica and anodized finishes (see pg. 32).

VistaLuxe AL LINE

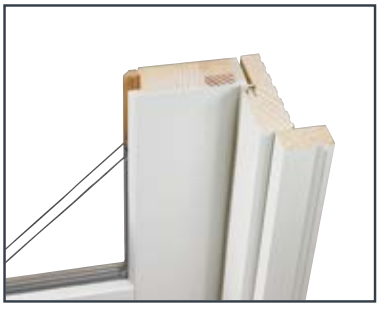
The VistaLuxe AL LINE frame is aluminum on the exterior and interior, separated by fiber reinforced polyamide strips. The aluminum is made with a high percentage of recycled content and has a long lifespan, while the thermally broken construction enhances energy efficiency. Available with powder-coated or anodized finishes (see pg. 33).

Kolbe's VistaLuxe® AL LINE of windows and doors is manufactured using **Reynaers Aluminium extrusions and system profiles.**



Ultra Series

The Ultra Series extruded aluminum-clad frame can be used for Ultra Series and Heritage Series door panels, and matches Ultra Series windows for a consistent look. As standard, the frame is finished with a 70% PVDF fluoropolymer finish that resists chalking and fading over time, and is offered in our extensive color selection (see pg. 32). Accessory grooves are integral to the frame for the easy addition of extruded trims. Numerous brickmoulds and casings are available as well (see pg. 26).



Heritage Series

The Heritage Series wood frame can be used for Ultra Series and Heritage Series door panels, and matches Heritage Series windows for a traditional look. As standard, the exterior is finished with a latex primer, or may be coated with K-Kron II – a durable finish that enhances and preserves the look of wood doors (see pg. 32). Heritage Series frames come standard with 1-15/16" brickmould; other casings are available (see pg. 27).

Sills

Various types of sills are available for both inswing and outswing doors, with attractive finish choices. Contact your Kolbe dealer to determine the products best suited to your needs.

Description		VistaLuxe WD LINE	VistaLuxe AL LINE	Ultra Series	Heritage Series
Inswing Doors

Glass Options

There is so much more to glass than visibility. It can add to the aesthetic, enhance indoor comfort and acoustics, or provide privacy and impact resistance. From smart coatings to smart glass, Kolbe's numerous glass options provide optimum energy efficiency, beauty and performance – to enhance your design as well as your lifestyle.

Photos © Peter VonDeLinde Photography

Low-E Coatings

Kolbe offers glazing options to provide optimum energy efficiency for the geographic region in which you live. Low-E is a "smart" coating that reduces energy transfer through the insulating glass unit, resulting in reduced heating and cooling costs throughout the year. Low-E coatings also reduce the potential for condensation, as well as provide protection against fading of furniture, fabrics and carpeting.

Solar Gain Low-E

When the weather turns frigid, Solar Gain Low-E glass is the perfect cold remedy. It keeps homes warmer and more comfortable by blocking heat loss to the outside and letting the sun's heat stream in to increase solar heat gain.

Solar Low-E (Kolbe's standard)

Suitable for most climates and meets most energy zone requirements. Solar Low-E glass is designed to reflect room-side heat back into the room during winter months. In summer, visible sunlight is allowed in while blocking most of the sun's infrared heat energy.

Solar Control Low-E

Offers an ideal balance of solar control and high visibility by blocking 95% of UV rays while maintaining the interior temperature.

Solar Advanced Control Low-E

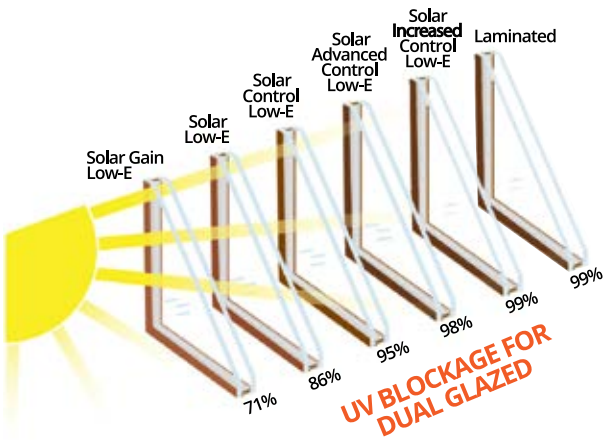
A tinted glass recommended for warm climates that achieves greater solar control over a wide range of the spectrum, while also helping to reduce glare.

Solar Increased Control Low-E

Provides a four-layer silver coating with 52% visible light transmission while offering 99% UV protection. This glass is generally used in warm climates and is formulated to manage solar heat gain while maintaining clearer views.

ThermaPlus™ Low-E

An additional Low-E coating which helps to meet the strictest energy requirements by providing protection against heat loss and UV damage. Available with dual pane versions of Solar Gain Low-E, Solar Low-E, Solar Control Low-E, Solar Advanced Control and Solar Increased Control Low-E glass.



Not all glass is available for all products.
Low-E insulating glass with a stainless steel spacer bar carries a 20-year warranty.
Not all glass options listed have the same glass warranty. Contact dealer for details.

Performance Options

Kolbe offers entrance doors that are designed to stand up to harsh climates and extreme weather conditions, with various glass options that address building codes and hurricane resistance.

Photo © Keen Eye Marketing

Laminated

Benefits include safety, security, sound control, and the ultimate in UV blockage. Designed to stay intact if the glass is broken, laminated glass acts as a durable shield. Upon impact, most broken glass fragments adhere to the interlayer, keeping the door intact and prohibiting debris from entering the opening.

Tempered

Standard in Kolbe doors to address safety concerns. Also available in window units to meet specific building codes.

Triple Pane

Provides a greater energy performing door that keeps indoor air warm and comfortable, prevents heat loss, and can lower your heating bills. It is constructed with three panes of glass, thermal spacer bars, and is available in Solar Gain Low-E, Solar Low-E, Solar Control Low-E, Solar Advanced Control and Solar Increased Control Low-E glass.

Impact*

Glazing utilized to withstand harsh environmental conditions, especially in coastal regions. Combined with an impact rated product, this glazing offers the highest level of security.

*Not all products are available with impact capabilities. See Kolbe dealer for details.

Specialty Glass + Additional Options

Kolbe also offers additional glass options for uniquely decorative windows and doors, including custom solutions and special surface treatments.

Smart Glass

Kolbe offers a selection of doors with smart glass that can switch from transparent to obscure on demand – for various levels of privacy when and where you need it. Easily integrated with smart home systems, these switchable glass options provide modern versatility and dynamic shading – whether 'on', 'off ' or anywhere in between.

See your local Kolbe dealer for details.

Bird-Safe Glass

A pattern or design on the exterior surface of the glass helps birds to see the solid barrier. The patterns can range in visibility to humans so the view is not obstructed.

Contact your local dealer to request samples and select the best solution for your project.

Turtle Glass

Achieves turtle code lighting ordinance enforcement while meeting all other NFRC thermal performance standards.**

Please check your local building code ordinances for specific values.

**Visible Transmittance at or below .45.

Preserve® Film

When applied to glass surfaces, this film helps protect against scratches during transit and construction. Also helps reduce the time involved in job site clean-up.

Neat+™

Harnesses the sun's UV rays to break down greenhouse gases, other pollutants, and loosens dirt so water can rinse it away, leaving glass cleaner, longer. A special sputter-coating process makes the glass ultra smooth, so the water "sheets off" more readily than it would on uncoated glass, allowing you to spend less time cleaning.

Tinted, Colored or Patterned

Provides shading, privacy or visual interest.

Not all glass is available for all products.
Not all glass options listed have the same glass warranty.
Neat+ and Preserve are trademarks of Cardinal IG.

Divided Lites

Available for VistaLuxe WD LINE,
Ultra Series & Heritage Series

Expand the character of your home or project by adding one of our divided lite options to your entrance door. Choose from a traditional, colonial-style pattern to a unique, custom design to accentuate the overall appearance of your entryway.

Performance Divided Lites

Kolbe's performance divided lite (PDL) glazing system gives the appearance of true divided lites without sacrificing energy efficiency. Extruded aluminum bars are adhered to the exterior and pine bars are adhered to the interior of the single lite of insulating glass. Spacer bars are installed within the insulating glass unit; together, these bars create the illusion of true divided lites. The exterior finish of the aluminum bars will match the exterior finish on the unit.

PDL bars are available in 5/8", 7/8", 1-1/8", 1-3/8", 1-3/4", 2-1/4" or 4-1/2" bar widths, plus custom sizes and patterns.

Beveled PDL

Ovolo PDL

Square PDL

Triangular PDL*

True Divided Lites

True divided lites (TDL) are available for Heritage Series wood doors, and are often used in restorations requiring historical accuracy. These individual panes of glass are held in place with horizontal and vertical wood bars using interlocking half-lap joints. Profile shadow lines enhance the warm, richness of the wood on both the interior and exterior. The exterior finish on the bars will match the exterior finish of the unit.

TDL options include custom patterns and bar widths, other wood species and interior stain or paint finishes. Depending on glass options chosen, standard bar widths are available in 7/8" or 1-1/8". TDL glass units are not filled with argon gas.

Ovolo Profile

Add Dimension to VistaLuxe AL LINE Doors

Aluminum bars are adhered to the exterior and interior of the single lite of insulating glass, with spacer bars installed within it, to help create the illusion of true divided lites.

Square profile PDL bars are available in 1-1/4" widths. PDL bars are field applied only. Spacer bars are available in Black only. Spacer bars may not be available for all configurations.

NOTE: Not all divided lite profiles are available for all products. See Kolbe dealer for details.

* Triangular divided lite profiles are only available for VistaLuxe WD LINE products. Triangular PDL bars are available on the interior only, in 7/8" widths, and are not available for 1-3/4" thick doors. Further limitations may apply. Please consult your local Kolbe dealer for more information.

Finish Options

Available for VistaLuxe WD LINE,
Ultra Series & Heritage Series

Interior Wood Species

In addition to the standard pine, Kolbe's doors can be constructed of other optional species that enhance their look. Pine and other wood species are sourced from managed forests. The Forest Stewardship Council® (FSC®)-certified wood species are also available to help support responsible forestry (FSC® license code FSC®-C019541). Ask about the availability of additional wood species.

Interior Wood Finishes

For units that are ready to install upon delivery, most of Kolbe's wood doors can be prefinished on the interior with one of the water-based stains or paints shown. Stained units are given two coats of satin clear finish. Because our interior finishes are water-based, low-VOC stains and paints, you can rest assured you've made an environmentally conscious decision. Custom stain and paint colors are also available.

Some options for our products may have limited color offerings or may incur a nominal charge. Check with your Kolbe dealer for further details on pricing and availability.

*Applied as a single coat of paint, with some visible wood grain.

NOTE: Most Kolbe products are constructed of Pine unless otherwise requested. Because wood varies by nature, the wood used in our products may vary in grain and color from that shown here. Please make selections using actual wood samples from your local Kolbe dealer.

Printed images of wood species and stain options will vary from actual product colors. Stain colors are shown on pine. A double coat clear finish is also offered. Since no two trees are identical, wood can be expected to differ both in color and graining. These factors will influence the stain's final color.

Color-matched interior paint is available through any Sherwin-Williams retail store in the United States and Canada. Kolbe's color formula can be found in their National Account System.

Exterior Colors & Finishes

Kolbe's aluminum-clad VistaLuxe WD LINE and Ultra Series products can be finished with a 70% PVDF fluoropolymer coating – ideal for durability and resistance to chemicals, abrasion, corrosion and weathering. In addition to the standard palette, custom colors can be specified, as well as four Anodized* aluminum and four Mica* fluoropolymer finishes. Durable K-Kron II finishes are available for Heritage Series all-wood windows and doors.

Not all colors are available for all products. Some options for our products may have limited color offerings or may incur a nominal charge. Check with your Kolbe dealer for further details on pricing and availability. Printed images of exterior finishes may vary slightly from actual colors. Selections should be made based on actual color samples available from your Kolbe dealer.

* Heritage Series products are not available in Bronze, Onyx, Coal Black, Midnight, Corbeau, Tungsten, Eclipse, Mica or Anodized finishes.

Mica finishes are 70% PVDF fluoropolymer as standard. Fluoropolymer coatings meet performance requirements of AAMA-2605 and are recommended for coastal and heavy salt concentration areas. See your Kolbe dealer for details.

There is a "color range" with anodized colors. That is, there is an acceptable "light" to "dark" color range that can be experienced on any job. According to AAMA 611-98 specifications, Section 8.3, the range may be up to 5 Delta E's. We can provide from our anodized vendor color samples of this color range if requested. The color range is due to numerous variables which include (but are not limited to) the shape of the parts, alloy variations and time in the anodizing process. This could mean that a sash part may appear slightly different in color than a frame part. This is/will be acceptable. Even the samples that may be provided may vary from the final product due to the variables. You must be aware of this as this will be considered acceptable.

Mica and Anodized finishes are specialty colors that will incur added charges and longer lead times.

Specialty Finishes

In addition to a choice of standard to exotic wood species, custom colors or finishes, Kolbe can also add a custom surface texture to your entrance door for even more impact. Some examples are below.

Wire Brush Finish

Most Kolbe wood doors can be further enhanced by our wire brushed finish. Wire brushing creates a rugged texture and adds character – the perfect option to complement any rustic-styled home. Due to the nature of the finish, certain limitations apply. Wire brushed products must be stained or painted in the field.

Decoral Finish

Kolbe can also add a wood aesthetic to an aluminum-clad door with a custom Decoral finish. Artfully applied to resemble the look of natural woodgrain, you can reap the benefits of the aluminum exterior while enjoying the look of real wood.

Ask us about other custom finishes that can be applied to your entrance door.

Finish Options

Available for VistaLuxe AL LINE

Interior & Exterior Finishes

The VistaLuxe AL LINE offers sophisticated finishes that enhance the lifelong beauty of your doors. Four powder-coated and three anodized surface treatments are available, for protection of the aluminum as well as for design aesthetic.

Printed images of interior and exterior finishes will vary from actual colors. Selections should be made based on color samples available from your Kolbe dealer.

There is a "color range" with anodized colors. That is, there is an acceptable "light" to "dark" color range that can be experienced on any job. According to AAMA 611-98 specifications, Section 8.3, the range may be up to 5 Delta E's. We can provide from our anodized vendor color samples of this color range if requested. The color range is due to numerous variables which include (but are not limited to) the shape of the parts, alloy variations and time in the anodizing process. This could mean that a sash part may appear slightly different in color than a frame part. This is/will be acceptable. Even the samples that may be provided may vary from the final product due to the variables. You must be aware of this as this will be considered acceptable.

Hardware Options

Kolbe offers hardware options that are engineered for functionality as well as aesthetic. An array of lever handle styles, featuring single- and multi-point locks, with optional keyed handle sets and deadbolt locks, is available.

Available for VistaLuxe WD LINE, Ultra Series & Heritage Series

Choose from the hardware styles and finishes shown on pgs. 34-39, or see the full selection at **kolbewindows.com.**

Not all handle styles, colors and finishes are available for all product lines. Please contact your Kolbe dealer for product specifics.
Oil-Rubbed, Dark Oil-Rubbed, White Bronze and Dark Bronze are living finishes that will change appearance with time and use.
Matte Black/Brushed Gold is for Dallas swing door handle sets only, and is the only two-tone finish available.
Printed images of hardware finishes will vary from actual colors. Selections should be made based on color samples available from your Kolbe dealer.

Hoppe® European Style Hardware

Kolbe's offering of European Style hardware for select swinging entrance and pivot doors features multi-point locks and handles situated above the locking cylinder.

München
(shown in Antique Brass)

Toronto
(shown in Smoky Gray)

Verona
(shown in Rustic Umber)

Dallas
(shown in Satin Nickel)

Hoppe® American Style Hardware

With the deadbolt positioned above the handle, multi-point American Style hardware actuates independently of the multi-point extensions to allow for quick locking in any sequential order. On French doors, it prevents the secondary panel from being opened before the primary panel.

München
(shown in Bright Brass)

Toronto
(shown in Satin Nickel)

Verona
(shown in Chrome)

Dallas
(shown in Matte Black)

Hoppe® Thumb Latch Style Hardware

Available for swinging entrance doors, Kolbe's offering of Thumb Latch Style handle sets also features multi-point locks, with the deadbolt situated above the handle.

Traditional Verona II
(shown in Rustic Umber)

Traditional München II
(shown in Brushed Chrome)

Contemporary Dallas II
(shown in Matte Black)

Hoppe's Resista® finish is available in select colors to help protect the surface from tarnishing, peeling and cracking. Recommended for coastal applications.

Printed images of hardware finishes will vary from actual colors. Selections should be made based on color samples available from your Kolbe dealer.
Not all hardware options are available for all product lines. Limitations may apply. See your Kolbe dealer for details.

Ashley Norton Hardware

Kolbe's selection of Ashley Norton Hardware allows design flexibility, with a choice of material, backplate, lever style and finish, for a truly personalized entryway. The European styling of these architectural handle sets adds elegance and distinction to swinging doors. Solid brass or bronze levers and backplates are offered in a variety of combinations and finishes for creating your own unique handle set.

Apollo Lever
(shown with brass City backplate in Polished Chrome)

Chester Lever
(shown with brass Rectangular backplate in Dark Oil-Rubbed)

Bauhaus Lever
(shown with brass City backplate in Satin Nickel)

Colonial Lever
(shown with brass Rectangular backplate in Dark Oil-Rubbed)

Meridian Lever
(shown with bronze Urban backplate in Dark Bronze)

Atlas Lever
(shown with bronze Urban backplate in Dark Bronze)

Churchill Lever
(shown with bronze Rectangular backplate in Dark Bronze)

Hampton Lever
(shown with bronze Rectangular backplate in White Bronze)

NOTES: Bronze handle sets and backplates are suggested for coastal applications.
Printed images of hardware finishes will vary from actual colors. Selections should be made based on color samples available from your Kolbe dealer.
Not all hardware options are available for all product lines. Limitations may apply. See your Kolbe dealer for details.

Baldwin® Hardware

Kolbe offers elegant handle sets designed to coordinate with luxurious décor. Multi-point locking hardware with weather-resistant stainless steel operator parts and hardware channels are available, as well as keyed handle sets. Baldwin handle sets for swinging doors are available in the styles shown below, in a variety of finishes (see pg.34).

Boulder
(shown in Rustic Umber)

Bristol
(shown in Satin Brass)

Concord
(shown in Antique Brass)

Kensington
(shown in Bright Brass)

Lakeshore
(shown in Satin Nickel)

Santa Monica
(shown in Brushed Chrome)

NOTE: Only Lakeshore and Santa Monica are available on doors with 3" stiles.

Baldwin's PVD (Physical Vapor Deposition) finish is available in select colors to help protect the hardware finish from tarnishing, peeling and cracking.

Pull-style Pivot Door Handles

Available for VistaLuxe WD LINE Complementary & Ultra Series

Rockwood® GeoMetek Pull Handles

In addition to lever style handle sets, Kolbe's VistaLuxe WD LINE Complementary and Ultra Series inswing and outswing pivot doors are also available with full length Rockwood® GeoMetek pull handles in Satin Stainless or Black Suede, for a sleek, minimalist design. A thumb turn mechanism on the interior locks the handle into the head jamb and the sill. A keyed cylinder on the exterior allows unlocking from the outdoors. See your Kolbe dealer for details.

NOTE: A minimum jamb size of 6-9/16" is required.

Pull Handle
(shown in Satin Stainless)

NOTE: Not all handle styles and finishes are available for all product lines. See Kolbe dealer for more information.
Printed images of hardware finishes will vary from actual colors. Selections should be made based on color samples available from your Kolbe dealer.

Hinges

Outswing doors feature Bright Brass 4" x 4" non-adjustable hinges with 1/4" radius corners. Additional residential and commercial grade options are available in multiple styles, sizes and finishes. Certain limitations apply. Talk to your Kolbe dealer to find the option that best suits your project.

Available for VistaLuxe WD LINE, Ultra Series & Heritage Series

Non-Adjustable

Residential-grade 4" x 4" ball-bearing with 1/4" radius corners

Bright Brass | Antique Brass | Satin Nickel | Antique Nickel | Stainless Steel | Oil-Rubbed | Matte Black

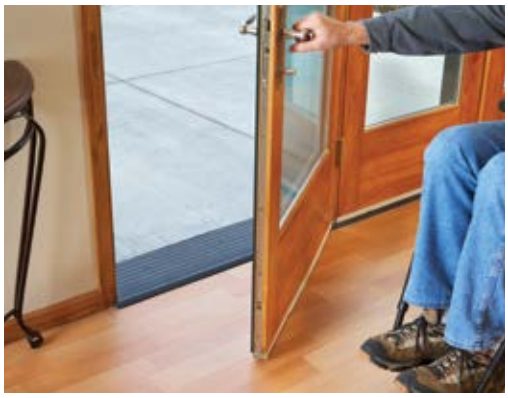
* Ask your local Kolbe dealer about optional Curved and Straight Pull-style handles for VistaLuxe AL LINE pivot doors.

Additional Options



Universal Design

To meet the needs of homeowners with physical limitations, Kolbe offers a variety of doors that are designed to make independent living possible. Wider doors provide additional space for those using mobility aids, and door sills that create a flush surface allow easier passage between the interior and exterior. In addition to ADA-compliant sills and lever style door hardware for ease of operation, our numerous options will help make living at home easier.

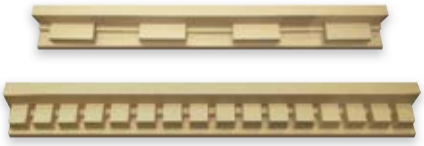
Many of these options meet standards of the Americans with Disabilities Act.
Other options, such as taller bottom rails on doors, are also available to meet these standards.
Certain product limitations and modifications may apply. Please contact your local Kolbe dealer for more information.

Automation

For added ease of use, Kolbe integrates the latest technology into select door products, putting the control at the user's fingertips so entrance doors can be engaged or disengaged electronically for easy, secure operation. Electronic multi-point locks can be factory-installed into a door panel and integrated with operating systems, ranging from keypads to fingerprint swipe activation. In addition, the doors can automatically lock when closed. See Kolbe dealer for details.

Dentil Shelves

Dentil shelves are an option for Craftsman style doors. Choose from a 4-block or a 16-block style shelf to add a custom look to your door. The shelves are made from a durable high density polyurethane (HDP) which will not split, rot or warp. Each piece has an oak grain texture and can be stained or painted to match the finish of your door.



Architectural Panels*

As an option for VistaLuxe AL LINE entrance door configurations, Mapes-R™ panels can be utilized in doors, sidelites and transoms as a design solution that can be color matched to the sash and frame for a uniform appearance. Unlike glass, these architectural panels create a flat panel effect with no visibility or light transmittance. These custom aluminum panels are filled with high density insulation, and can meet local building codes for sound, fire and impact resistance. See your Kolbe dealer for more information.

Impact Performance Modifications

Select entrance doors are available with performance packages to meet even the strictest building code requirements. Depending on the criteria, Kolbe offers high performance and impact performance products to improve air, water and structural ratings or sound transmittance ratings. Products are specially designed with the strength and durability to withstand hurricane force winds and flying debris in the coastal regions. Contact your Kolbe dealer for further details.

NOTE: Options are not available on all products. Please ask your dealer for more information.
* Architectural panels may require longer lead times. See Kolbe dealer for details.

We're for the visionaries.®

We're for people who take building to new levels.

© Cody Roche | Roche Media Group

We're for people who are passionate about design, who care about the big picture and the smallest detail. We're for people who aren't satisfied with mainstream choices... who push the limits of what's possible with the options and innovations that can only be found in Kolbe windows and doors.

We're for quality craftsmanship.

We're for a tradition of excellence that outlasts the latest design trend. The Kolbe story began with a family and a vision. Nearly 80 years after the Kolbe brothers began their commitment to producing premium quality windows and doors, products bearing their family name can be found in some of North America's most impressive homes and businesses.

We're for expertise.

We're for people who dream of a personalized design experience. That's why you can't find Kolbe windows and doors in the aisles of a home center. Our products are only available through a Kolbe dealer, because they are as passionate about windows and doors as you are about bringing your vision to life. And they will work with you to make your dream a concrete reality.

We're for possibilities.

We're for people who won't settle for "standard." We're for limitless options and custom solutions that can only be found in Kolbe's made-to-order products. Our team members are craftspeople who focus on building one window or door at a time, to create distinctive products that fulfill your unique vision.

We're for innovation.

We're for people who want to take building to new levels, with advancements in not only extraordinary sizes and shapes, but also ground-breaking products. We're for creative thinking that redefines what's possible, constantly reimagining our windows and doors to elevate style, performance and functionality.
