

## encasol™ SPILL CLEAN UP PROCEDURE

**Caution:** Do not use for hydrofluoric Acid!

1

Apply product generously around spill perimeter to stop it spreading further.

2

Add lesser amount to cover the surface.

3

With stiff broom aggressively work the product towards the centre until all spill is absorbed.

4

When surface clean, sweep up product.

5

Remove all traces of product to avoid slip hazard.

6

Return all used product to storage container to mix with unused absorbent ready for re use.

**Note:** product is friction activated so for best results apply a vigorous sweeping action with a stiff bristled broom

**Emergency Overview:** Dust may cause skin and eye irritation. The product has not been classified as a carcinogen by NTP or IARC.

### First Aid Measures:

**Eye Contact** - Dust particulate can cause temporary irritation. Rinse thoroughly Do NOT rub eyes. If irritation continues see a physician.

**Skin Contact** - N/A

**Ingestion** - Inert mineral silicate is not hazardous.

**Inhalation** - Remove to fresh air. Drink water to clear throat and blow nose to evacuate dust. Dust mask is recommended in windy conditions

### Firefighting Procedures:

**Extinguishing media** - This product is not flammable or combustible. Use media appropriate to the surrounding fire. If used to absorb flammable liquids consult the SDS for the liquid absorbed.

**DISPOSAL:** Encasol™ Has passed the EPA's TCLP and RCRA standards for landfill disposal. Please check state and local authorities for additional regulations.
