

KWICKSCREEN AIR

PRODUCT FEATURES 2018

Light.
Thin.
Flexible.

Embodying all of the benefits and features of the original KwickScreen, the KwickScreen Air is ultra lightweight, more flexible and ready to help you create your space.

Features

Light

The Air features a simplified, lighter frame, with no aluminium casing. The handle and base have both been reduced in size and weight, allowing the frame to be supported on only two castors. This lightweight body allows effortless extension and retraction of the screen, with nearly no force required.

Thin

The slim design of the Air enables the product occupy the smallest of spaces. This is perfect for scenarios where space is precious.

Flexible

The screen has a full 180 degree range of movement, and can be extended at any angle within this range from the wall bracket. This increases the flexibility of the screen, meaning it can be used in more places.

Self-Closing

The screen attaches securely to the wall, and features an innovative self-closing mechanism. When retracted the screen will click shut, holding it seamlessly against the wall.

Feature Benefits

Fully Retractable

The KwickScreen Air can be retracted when not in use and pulled out to any length up to 3m in an instant without needing to use brakes.

Improved Infection Control

Made out of impermeable materials the KwickScreen Air can be wiped clean after every patient unlike curtains.

Privacy & Dignity

The KwickScreen Air provides great privacy and dignity for patients as it is more substantial than curtains. Multiple KwickScreens can also be joined to create a private, seamless bay.

Better Patient Experience

Art has a direct effect on health and well being, and the printable inners can bring the healing benefits of art to the patient and brighten up the clinical environment.

Cleaner & Safer Environment

With only two wheels there is no trip hazard along the length making the ward safer but also easier to clean around.

No Brakes

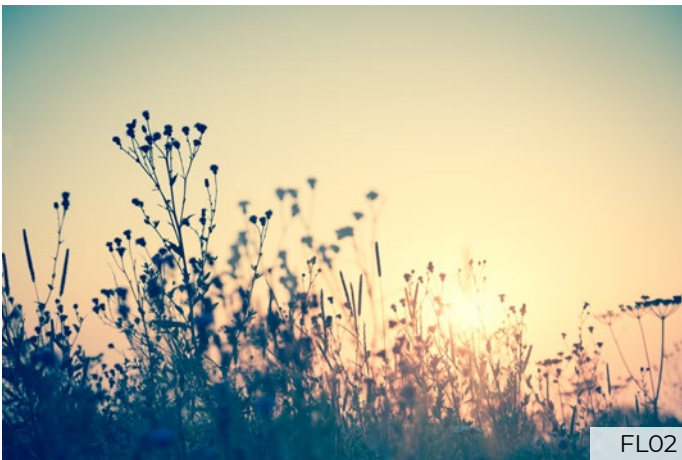

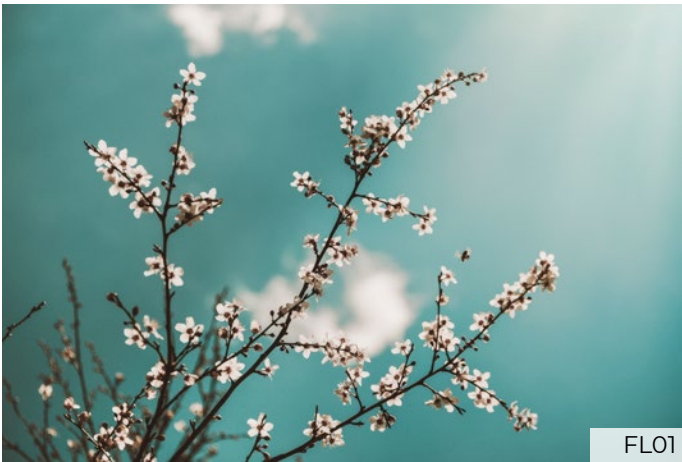

Unlike other screens, the KwickScreen Air does not need brakes to be held.

Customization

The Air features a double sided printable inner panel. You can customize your panels by choosing from the diverse selection of images within our print catalogue. The inner panels can be easily unzipped and replaced with different images whenever you wish, giving you complete flexibility with your designs. Our team will assist you in choosing complimentary images for your environment.

Assembly

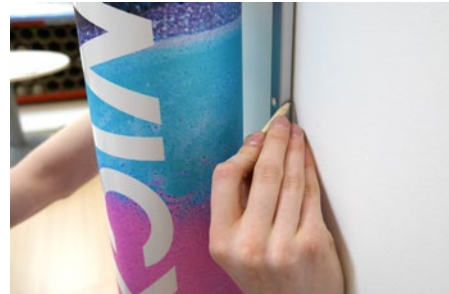

The screen is very easy to install, only requiring a handful of screws to attach it to the wall. Once assembled the screen is also easy to replace or repair, due to the interchangeable inner panels.

Environmental Safety

KwikScreen are committed to providing sustainable product solutions and reducing our environmental impact. We focus on three key areas:

- Waste & Recycling** - we are constantly trying to increase the recyclable mass of the KwikScreen and recycle as much production waste as possible.
- Sustainable Product Development** - we strive to create solutions which help our customers use their space more flexibly increasing building utilization and reducing the environmental impact.
- Reducing Energy Consumption** - throughout our factory and supply chain we look to reduce energy consumption. From small changes such as transitioning to LED lighting throughout to reducing the carbon footprint of our shipping through continuous optimization
