Transport Totes

Professional Grade Totes Last 20,000 Trips and Beyond

Transport totes take a lot of abuse in their travels and this line of heavy-duty, professional transport totes will stand up to the wear and tear. The outer shell is made with a heavy-duty PVC-coated 210D nylon and has dual-slider zippers, security style with leather pulls. Adjustable shoulder straps, a document window on the top of the bag, and an identification window on the side of the exterior for an easy way to label each tote. The inner 210D nylon can be used with ice packs or dry ice and cleans easily with a water/bleach solution. There is an interior zippered documentation pouch for storing specimen information.

Top Features

- Insulated heavy-duty, cleanable PVC-coated 210D nylon
- Liner wipes clean with 10% bleach solution
- Safely accommodates ice packs or dry ice
- Lockable zippers
- Interior and exterior document pouches and windows
