## CYLINDER TRACKING

General Distributing has an advanced cylinder tracking program that helps find missing cylinders and provides cylinder traceability. This system allows us to keep our customer cylinder balances accurate, therefore ensuring the accuracy of their rental bills. Our system also allows customers to log on to their account through our e-commerce platform and move cylinders between departments to ensure accurate cost accounting. Cylinder tracking helps:

- Flag stolen cylinders
- Confirm dates, times, and proof of signature for deliveries
- Identify lost cylinders
- Receive account information and cylinder turns
- Locate lot number to identify multiple component gas mixtures, concentrations, and tolerances when re-ordering specialty gases
