

MASK STANDARD: GB/T 32610-2016

- These non-sterile disposable masks use a five-layer filter system, composed of a central melt-blown non-woven filter and two outside protective layers of non-woven polypropylene fabric.
- A nose clip allows to create a proper seal around the nose.

5-layer filter system provides protection from these contaminants:

5 LAYERS OF PROTECTION

- 1- Non-woven fabric
- 2- Hot air cotton
- 3- Meltblown fabric
- 4- Meltblown fabric
- 5- Non-Woven fabric
