Hippo Anchor Deadweight System

Part ID: 65219, Part ID: 65220

KEY FEATURES

- Small footprint: 39.5” x 39.5”
- Compatible with roofs up to 5° pitch
- Works with lanyards with 900 lbs. maximum arresting force
- Galvanized finish and corrosion resistant
- Raised central anchor reduces travel distance in the case of a fall
- 12 plate system – 10’ from leading edge
- 16 plate system – 8’ from leading edge
- System is rated for 1 worker in fall arrest and 1 worker in restraint
- Meets compliance: OSHA 1926.502; ASSE Z359.1; CSA 259; Milirary Code – EM 385 - 1
- Product weight (65219): 630 lbs.
- Product weight (65220): 825 lbs.

The Hippo Anchor by Tie Down Safety is a deadweight anchor system that sits on the top of a roof without penetration. The heavy anchor weight design makes this an ideal fall arrest or fall restraint system. This design also prevents leaks and other damage from occurring. The Hippo Anchor comes in 12 plate or 16 plate configurations. This deadweight anchor is made for temporary or permanent applications and offers easy assembly. The Hippo Anchor complies with OSHA standards for a fall protection system. Tie Down Safety maintains high standards and quality control through quality raw materials and components in the USA.

Part ID: 65219 12 Plate Hippo Anchor (630 lbs.)
Part ID: 65220 16 Plate Hippo Anchor (825 lbs.)
