Personalize It!

Custom Metal Tags

We can custom stamp your information into brass, aluminum, and stainless steel tags in various shapes and sizes. Tags can contain any combination of your letters and numbers.

☑ Material, Shape, and Size

Your custom metal tag is stamped with information designed to last a long time. Metal tags can endure a wide range of temperatures and withstand tough environmental conditions. Choose brass, aluminum, or stainless steel.

Shape and size of the metal tag provide the means and reference for easy and quick identification. We list some of the more common shapes and sizes. All are available with a 3/16" hole.

Note: Other shapes and sizes are readily available. We provide that option under each material. Please contact us with your requirements for a quote.

☑ Lettering and Numbering

Determine your needs for specific lettering and/or numbering. Tags can contain a word, words, or a coding system. Information is stamped on a single line or multiple lines and can be all the same, unique, or in sequence. Sequential numbering provides unique and consecutive identification. For best contrast and visibility, stamped information is ink-filled black.

☑ Quantity

There is no set-up cost, and your custom order can start with a low quantity of 25 tags – just tell us how many you need.

Note: Quantity pricing is based on tags being:

- The same material, shape, and size
- Stamped with information up to three lines that is either identical information, sequential numbering, or sequential numbering with identical heading

Brass

Quantity breaks available. Contact us for a quote.

Shape / Size	No.
Circle	
1"	TDC110BR
1 1/4"	TDC112BR
1 1/2"	TDC115BR
