

Rapid Antibody Test Kits – Box of 20 Tests

\$380.00

Test kits are \$19/each and sold 20 kits to a box (\$380/box). Please order the number of boxes you require.

NOTE –

- An antibody test reveals if a person has **already been** exposed to an infection, by detecting antibodies in their blood or serum.
- An antigen test reveals if a person is **currently** infected with a pathogen such as the SARS-CoV-2 virus.

Description

- Test kits come in box of 20 (\$19/kit, \$380/box)
- FDA approved
- The COVID-19 IgG/IgM Rapid test Device is a simple lateral flow immunoassay for the direct detection of anti-SARS-CoV-2 IgG/IgM antibody
- The rapid test will provide a presumptive diagnosis of COVID-19 in a mere 15 minutes
- Test either whole blood, plasma, or serum
- IgG and IgM combined test – both have a 95% confidence interval
- Use COVID-19 IgG/IgM Rapid Test Kits under professional supervision

Antigen Test Kits – Box of 20 Tests

\$660.00

Box of 20 tests kits / \$660 per box (\$33 per test)

Please allow 10 – 14 days for processing and delivery.

NOTE –

- An antigen test reveals if a person is **currently** infected with a pathogen such as the SARS-CoV-2 virus.
- An antibody test reveals if a person has **already been** exposed to an infection, by detecting antibodies in their blood or serum.

Description

- Clinical Study Results – Detection Sensitivity 98.72%, Specificity 97.32%
- The kit uses immunocapture method; it is designed to detect the presence of absence of SARS-COV-2 nucleocapsid proteins in respiratory samples from patients with signs and symptoms of infection who are suspected of COVID-19
- Easy to collect samples, simple operation, without professional equipment
- Test results are available in 15 minutes, and the test results are clearly visible
- Convenient transportation and low price, higher accuracy
- Suitable for large-scale rapid screening
