

Pencil Holder

NIEHAUS LUMBER

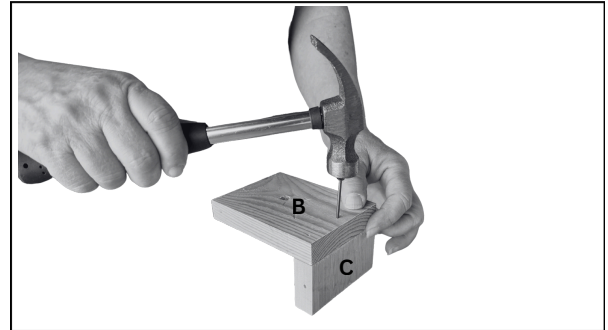

LITTLE BUILDERS

Step 1: Organize Materials

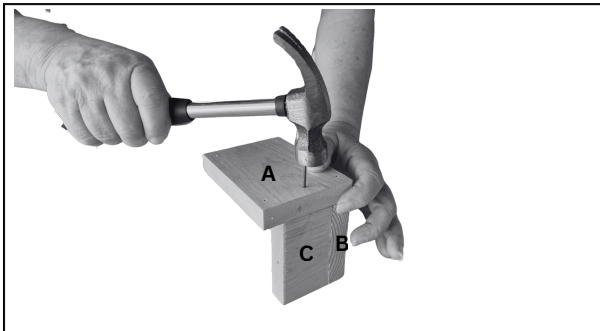

Lay out all pieces. Identify sides A (5 holes), sides B (3 holes), and bottom C.

Step 2: Attach First Side

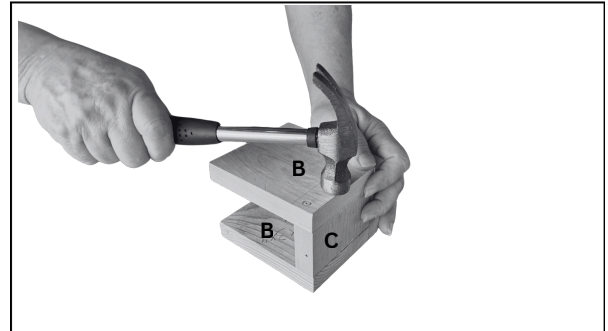

Nail one B side to the bottom C using the middle hole. Nail on the long side of C.

Step 3: Attach Second Side

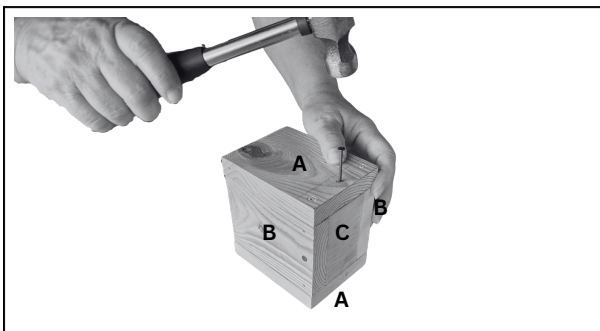

Nail one A side to the short edge of C, also using the middle hole.

Step 4: Attach Third Side

Add the second B piece to the next open edge of C, securing it through the middle hole.

Step 5: Attach Last Side

Add the remaining A piece to the final edge of C, securing it through the middle hole. Check that all sides are even and aligned.

Step 6: Secure & Decorate

Nail through the remaining holes (2 per B, 4 per A) to tighten the structure, then decorate your pencil holder with paint, stickers, or any finish you like.

Note: Find a more detailed version in our blog! Don't forget to ask an associate where to find extra things you might need to make your project stand out!
