Mika

MULTIPURPOSE CHAIR, COUNTER STOOL AND BAR STOOL

Design above.

Mika sits above most others in its class—and not just because it was a multi-award winner. Mika is elevated. Upholstered or non-upholstered, it reaches new heights in what a molded shell chair can be. From top to bottom, the design flows. Back and forth, the design rocks with 15 degrees of flex. Up and up, the design pushes an upholstered seat farther than ever before. And in the end, you arrive at a place of sit-ability and stack-ability hard to find in something that looks this good.

LINKING TABLES

High traffic. Low stress.

Tables are like bridges joining chairs and multiseating elements. Connect like items together or mix them up. For instance, a table can link to a guest or patient chair on one side and a pre-configured, freespan, start or end element on the other. In a start/center/end configuration, a table must connect to either a start or an end. End tables have two legs and 90° radius and square tables have one leg.
