Better Space. Better Work.

Visual Schedule Cards

Helping students understand what comes next – one simple visual at a time.

Every classroom has moments where students wonder, "What are we doing next?"

Visual Schedule Cards answer that question before it becomes a distraction. They help students see the day, follow routines, and move between activities with more confidence.

Special Education

Supports structure, visual learning, and independence.

Early Learning

Builds vocabulary, understanding, and daily routines.

TK - Elementary

Helps students stay organized and transitions go more smoothly.

Autism Support

Provides clarity, reduces anxiety, and supports success.

Simple visuals. Stronger routines. Confident learners.

The Challenge

Transitions can be **hard** when students do not know **what is coming next.**

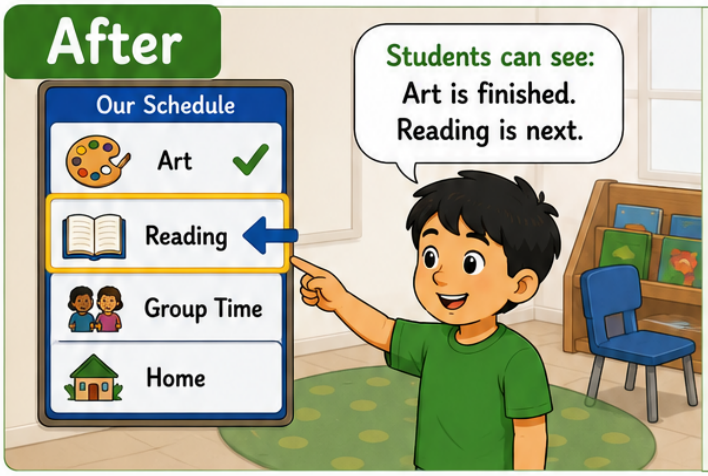

Teachers often spend valuable time repeating directions, answering questions, and helping students shift from one activity to another. For many learners, uncertainty can quickly turn into frustration or anxiety.

Before

- Questions
- Confusion
- Transition Delay
- Lost Learning Time

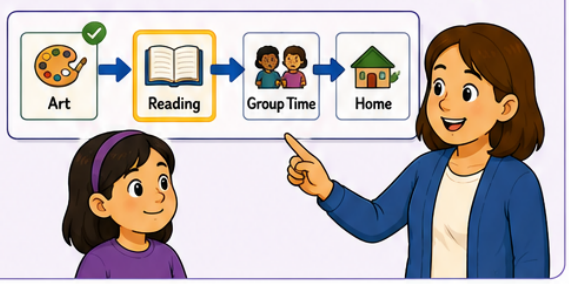

After

- Visual Reminder
- Smooth Transition
- Fewer Repeats
- More Learning Time

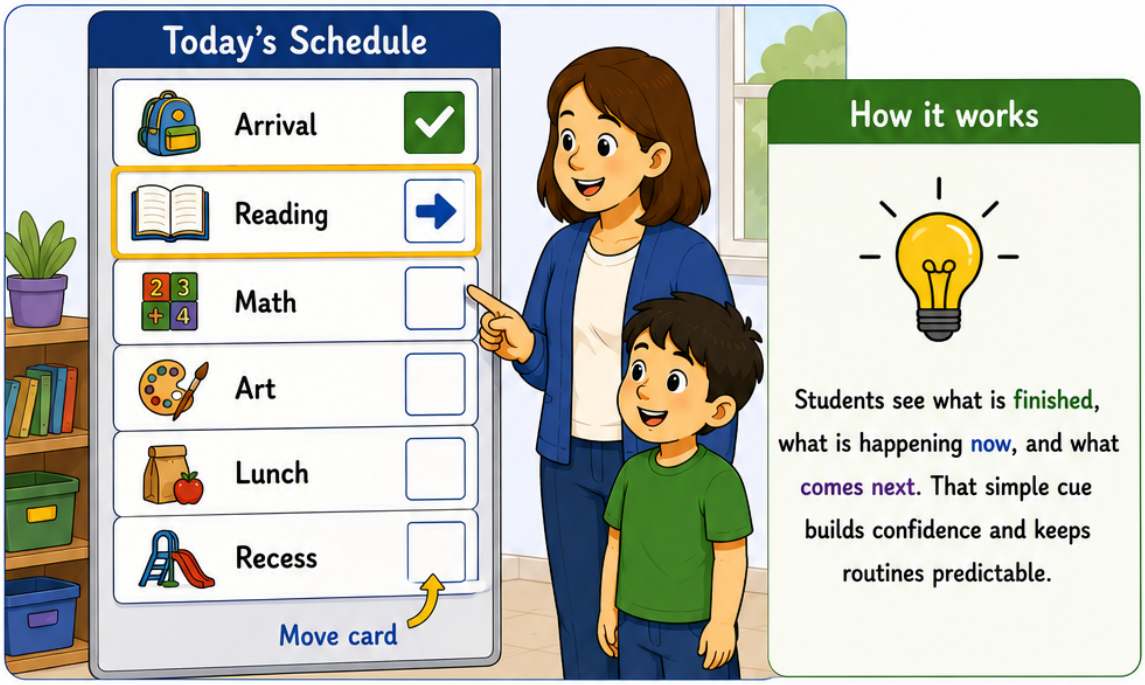

A small visual tool can make a big difference.

Instead of relying only on verbal directions, the **schedule stays visible all day.** Students can **check it** whenever they need reassurance, and teachers can **point to it** instead of repeating the same instructions again and again.

The Solution

A simple visual roadmap for the classroom day.

How it works

Students see what is finished, what is happening now, and what comes next. That simple cue builds confidence and keeps routines predictable.

Finished
This activity is done.

Now
This is the activity we are doing now.

Next
This is what comes next.

Why visual supports work

Verbal directions disappear quickly. Visual information stays available. Students can look back, process at their own pace, and build independence without waiting for an adult prompt.

Class routines

Keep the day predictable and reduce anxiety.

Center rotations

Help students move independently between centers.

Behavior support

Offer clear expectations and support positive choices.

Therapy rooms

Provide structure, reduce stress, and encourage participation.

Build Your Visual Schedule System

Everything needed to create cards that hold up to real classroom use.

Keep the system simple. Start with the supplies that directly help teachers create, protect, display, move, and store the schedule cards.

Cardstock

Print sturdy activity cards that feel durable in student hands.

Laminating Pouches

Protect cards from daily handling, spills, and repeated use.

Laminator

Turn printed visuals into reusable classroom tools for the year.

Magnetic Tape

Make cards easy to move on whiteboards and magnetic surfaces.

Hook & Loop Fasteners

Quickly swap cards on boards, folders, and first/then strips.

Pocket Chart

Display a classroom-wide schedule where every student can see it.

Teacher Tip

Start with 5 to 8 core activities. Once students understand the routine, add more detailed cards for centers, breaks, classroom jobs, or individual supports.

Classroom Benefits

Visual schedules support students and make daily routines easier for teachers.

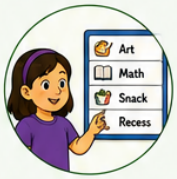

Students benefit from...

Confidence
They know what comes next.

Predictability
The day feels more consistent.

Independence
They can check the schedule on their own.

Communication Support
Pictures reinforce spoken directions.

Teachers benefit from...

Fewer repeats
Point to the schedule instead of saying it again.

Smoother transitions
Students are prepared before the change.

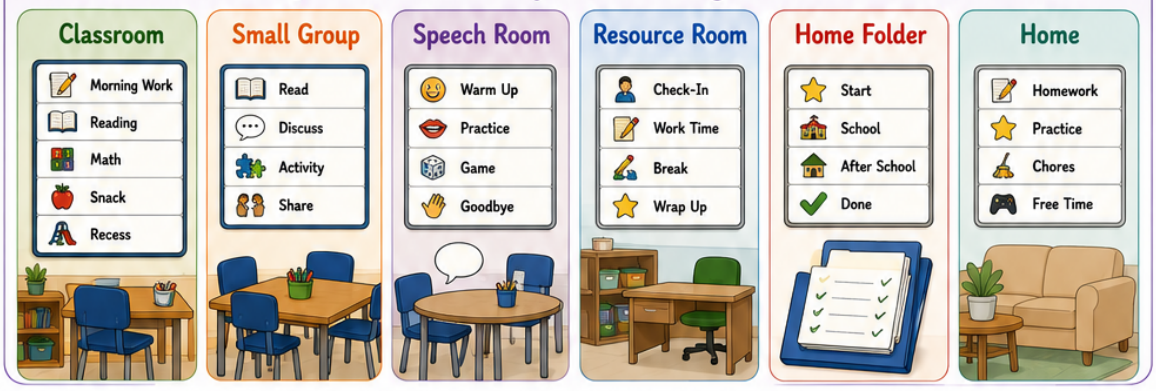

More learning time
Less time is lost between activities.

Better organization
The daily routine is clear at a glance.

One system. Many learning environments.

Use the same visual language across settings so students get **consistent support** throughout the day.

Shop the Solution

Build a practical **Visual Schedule Kit** without overbuying.

Recommended Visual Schedule Products

Cardstock

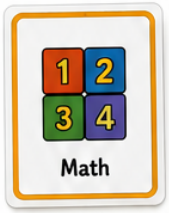

Laminator Pouches

Magnetic Tape

Hook & Loop

Pocket Chart

Create & Protect

- Cardstock or colored cardstock
- Laminating pouches
- Classroom laminator

Display & Move

- Magnetic tape
- Hook & loop fasteners
- Pocket chart or dry erase board
- Small storage box for extra cards

Ready to create more predictable classroom routines?

Whether you are supporting an entire classroom, a small group, or an student, **AAA Workspace** can help you build a visual schedule system that fits **your learning environment**.
