Fine Motor Development Activities

Scissor Skills Art

Cut, create, and build hand strength!

Grades PreK–3

20–30 minutes

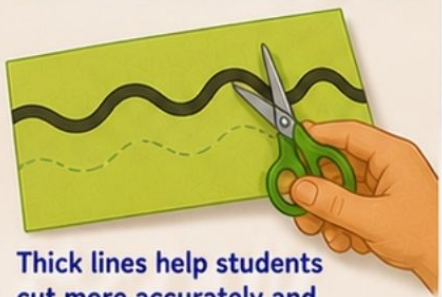

Cutting Practice

Students cut strips, shapes, or lines and arrange pieces into simple collage art.

Adaptations

Use thick guide lines.

Thick lines help students cut more accurately and build confidence.

Offer pre-cut pieces.

Pre-cut shapes help students focus on creating instead of cutting.

Allow tearing instead of cutting.

Tearing paper builds hand strength and is a great alternative.

Small steps today. Big skills tomorrow! Practice. Create. Celebrate!
