Sensory Learning Projects

Clay & Dough Exploration

Squish. Shape. Create. Explore with your hands and tools!

Grades PreK–6

20–45 minutes

Hands-On Sensory

Students roll, press, stamp, flatten, and sculpt clay or dough into simple shapes and objects.

Adaptations

Offer tools instead of direct hand contact.

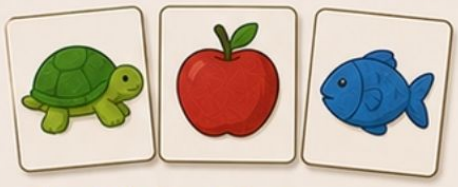

Tools help build skills while respecting comfort.

Use small portions to reduce overwhelm.

Smaller amounts are easier to manage and less stressful.

Provide visual examples.

Visuals help students understand what to make.

Explore. Touch. Create. Learn! Every squish is a new discovery!
