SERVICES

AIR TOOL REPAIR

Offering full service repair by factory-trained service technicians for all tool brands listed on our line card. Whether it be a tune-up, warranty issue or parts replacement, we have you covered.

EQUIPMENT REPAIR

Offering on-site and in-house equipment repair for all equipment brands listed on our line card. Our service technicians have years of experience working on different equipment and their applications. From start-ups to re-builds, our knowledge and expertise will confidently get you where you need to be with your process.

PREVENTIVE MAINTENANCE PROGRAMS

Is your equipment running efficiently? We can help you to optimize it and improve your overall operations. Our experienced service technicians will provide a full equipment evaluation and a follow-up quote that includes labor and all necessary parts needed for repairs or upgrades. From there, your company will be put on a regular schedule for check-ups to ensure your equipment has less down time and is running at peak performance.

Examples of equipment we work with on this service:

- Air Blast Systems
- Wheel Blast Systems
- Reclaim Systems
- Vibratory Systems
- Pneumatic/Auger Recovery
- Wide Belt Sanders

PROCESS IMPROVEMENT LABS

Whether you are an existing user of abrasive and blasting equipment, or a novice, the process improvement lab has tremendous potential to increase your productivity and add to the profitability of your operation. Our process improvement labs have a range of blasting, finishing, and vibratory equipment. Allow us to help you develop or improve your process to reduce the overall cost per part in your operation.
