PRINTMATRIX® · TURN-KEY PRINT MANAGEMENT PROGRAM

maps — directions for better technology — modern advanced print solutions

mpsExpress.

Take control of the last unmanaged expense.

In most organizations the printer fleet is the one remaining line item with no inventory, no owner and no reporting. mpsExpress manages, services and supplies the fleet you already run — mixed brands, multiple locations — with one point of accountability.

What you get

Six program elements, one program.

- **Print management software**
- **Technical service & parts**
- **Toner & consumables**
- **Inventory management**
- **Ongoing consulting**
- **Single point of contact**

Billed on pages produced. mpsExpress runs on a cost-per-page platform, with separate mono and color rates or one blended rate — so print cost follows actual use, device by device, site by site.

How it works

Your fleet.

Keep the devices you already own or add newly acquired ones, any mix of brands. MAPS documents every device, user and location.

Your pages.

You are invoiced on the pages you produce. Supplies ship automatically before they run out, and service is covered in the rate.

One partner.

MAPS monitors, maintains and supplies the environment, with scheduled business reviews and one named contact for all of it.

Built for

Mixed fleets

Multiple brands and models with no single owner or standard.

Multiple locations

Sites and departments that need one program and one report.

Usage-based billing

Organizations that want cost to track pages produced.

Equipment you own

Fleets with useful life left that do not need replacing to be managed.

One matrix. Four ways in.

mpsONE — complete print-as-a-service. **mpsExpress** — turn-key management of the fleet you already run. **mpsONE Flex** — distributed print-as-a-service for branch, home and hybrid users. **mpsAdvantage** — all-in-a-box managed print with no software on your network. No tiers, no upgrades: the right one follows from your fleet and your finance preference.

Your fleet. Managed as one.

A no-obligation fleet assessment takes less than a day onsite and shows you what your current environment really costs.
