modern advanced print solutions

mpsONE.

One monthly rate. Unlimited printing.

The device. The toner. The service. The support. One predictable monthly cost — with no equipment purchase, no metered pages, and no surprise invoices.

What you get

Everything below is in the rate.

- ✓ The device
- ✓ Unlimited printing
- ✓ Toner & consumables
- ✓ Service & mechanical parts
- ✓ Maintenance kits
- ✓ Monitoring
- ✓ Technical support

Nothing is billed separately. Traditional print models split hardware, supplies, and service across three budgets and three vendors, then add page charges on top. mpsONE replaces all of it with one fixed subscription — so the number you approve is the number you pay.

How it works

One device.

Select the right device for the users and the workflow — desktop or floor-standing, black and white or color. MAPS provides it, installs it, and configures it.

One rate.

A fixed monthly amount replaces variable print expense. No meter reads, no cost-per-page reconciliation, no unbudgeted repair invoices.

One partner.

MAPS supplies, monitors, maintains, and supports the environment — one named contact accountable for all of it.

Built for

Predictable print costs

Organizations that need print to behave like a fixed line item instead of a variable one.

Consistent, high demand

Departments printing steadily enough that fixed monthly pricing is simpler than tracking every page.

Replacing aging equipment

Fleets at end of life, where a refresh would otherwise mean a capital request and an approval cycle.

Hardware and MPS together

Customers who want the equipment and the managed services under a single agreement, from a single partner.

The mpsONE family

mpsONE — Complete Print-as-a-Service for the devices your teams work on daily. **mpsONE Flex — Distributed Print-as-a-Service** extends the same all-inclusive model to branch offices, home offices, and hybrid workers.

Everything you need. One monthly rate.

A no-obligation fleet assessment takes less than a day onsite and shows you what your current environment really costs.
