RIGID EMT

SPEED THREAD ONE HOLE CONDUIT STRAPS

EC&M Product of the Year
2025 Category Winner

PRODUCT BENEFITS

Speed Thread conduit straps come pre-threaded with a captive screw. They are easier to install, reducing installation time by up to 30%. Never lose a screw again because these screws are captive and will not fall out during installation. Simplify your job, and your parts list, by having both the screw and strap all in one.

RGD EMT ½" ¾"

SPEED THREAD®

Installs up to 30% faster!
